# GUILLEM MONTES

## Game Producer

I am Guillem Montes, a Game Producer with experience leading multidisciplinary teams of up to 40 people. Specialized in agile methodologies, risk management, and workflow optimization. I possess a strong analytical mindset and a keen interest in QA as a strategic entry point into the industry, contributing my rigor in testing, bug detection, and quality control, with the mid-term goal of advancing into production and project management.

| Front of House Manager                          |                |

## HIGHLIGHTED PROJECTS

### Shodõe

The most professional project with the highest production maturity I have worked on to date, successfully developed within the CITM pre-incubator. I led and managed a multidisciplinary team of 8 people from start to finish, taking full ownership of planning, delivery milestones, and the commercial viability of the video game.

### Warhammer 40,000: The Last Marine

My most ambitious project. A Diablo-like shooter set in the Warhammer 40K universe. I worked full-time as a producer for 4 months, leading a team of 40 people.

### Süreg's Mask

The project I'm most fond of. An RPG developed for the subject "Project 2". I was the producer of a 20 person team and also contributed to game design. It was awarded and showcased at IndieDev Day 2024.

## TECHNICAL SKILLS

- Production tools: Trello, Jira, Notion
- Game engines: Unity, Unreal Engine
- Programming languages: C#, C++, Python
- Design software: Photoshop, Illustrator
- Version control: Git, GitHub
